Minor revision 1.This research focused on What is the gut feeling telling us about physical activity in colorectal carcinogenesis?, very interesting topic. 2. The author have added a Figure, but I think the Figure was inappropriate in the “Colorectal cancer - epidemiology ”part, need to add in the “Potential pathways as explanatory mechanisms of the association between physical activity and prevention of colorectal cancer ”part; also lack the Figure legend, please add. 3. If that all be deal with, I agree to accept and publicate in this famous journal.
