Re: Manuscript No. 58749

Dear Editor,

thank you for your letter and the possibility of submitting our corrected manuscript titled "What is the gut feeling telling us about physical activity in colorectal carcinogenesis?" in a form of a opinion review for publication in the *World Journal of Clinical Cases*.

Round #1

We have marked **in red** all correction in the text.

Reviewer # 03408355

This paper focused on a very interesting question on the influence of physical activity. The text was well written. However, there were some language mistakes. Please check and correct them.

Thank you for your kind comment. We have corrected several typos and revised the manuscript for grammar and language.

Reviewer# 03270754

Minor revision 1. This research focused on What is the gut feeling telling us about physical activity in colorectal carcinogenesis?, very interesting topic. 2. Proper amount of exercise is good for the body's function, also prevention CRC. 3. Supply some tables and Figures maybe perfect this manuscript.

Thank you for your kind suggestion. We have added a Figure accordingly.

Reviewer# Lian-Sheng Ma, Peer Reviewer; Company Editor-in-Chief

I have reviewed the Peer-Review Report, the full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Clinical Cases, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Before final acceptance, the author(s) must add a table/figure to the manuscript.

Thank you for your kind comment. We have added a Figure accordingly.

Round #2

Re: Manuscript No. 58749

Dear Editor, thank you for your letter and the possibility of submitting our corrected manuscript titled "What is the gut feeling telling us about physical activity in colorectal carcinogenesis?" for publication in the World Journal of Clinical Cases. We have corrected the manuscript according to reviewer's comment and marked in green all correction in the text.

Reviewer # 03270754

Minor revision 1. This research focused on What is the gut feeling telling us about physical activity in colorectal carcinogenesis?, very interesting topic. 2. The author have added a Figure, but I think the Figure was inappropriate in the "Colorectal cancer - epidemiology" part, need to add in the "Potential pathways as explanatory mechanisms of the association between physical activity and prevention of colorectal cancer" part; also lack the Figure legend, please add. 3. If that all be deal with, I agree to accept and publicate in this famous journal.

Thank you for your comment. We have added Figure 1 in the suggested part as well as the Figure legend at the end of the manuscript.

We hope that the revised manuscript will be suitable for publication in the *World Journal of Clinical Cases*.

Thank you again for the privilege of submitting our work.

Sincerely,

Anna Mrzljak, MD, PhD, FEBGH
