[Epstein-Barr Virus-Positive Mucocutaneous Ulcer: Case ...](#)

<https://www.clinical-lymphoma-myeloma-leukemia.com/...>

The **Epstein-Barr virus** (EBV), also known as **human herpesvirus 4**, is a 172 kb, linear, and double-stranded DNA **virus** that infects humans ubiquitously. The **virus** is spread via oropharyngeal and genital secretions, infecting the vast majority by adolescence. EBV predominately infects both B cells and epithelial cells; **B cell** entry is mediated by CD21, and in epithelial cells lacking CD21 by ...
