SPECIFIC COMMENTS TO AUTHORS

This manuscript “Adaptation of international COVID-19 and breast cancer guidelines to local context” (Manuscript NO: 59303) proposed a triage guidelines for diagnosis and treatment of breast cancer. Although the innovation is not strong, it is still an important guideline for local healthcare system to make full use of medical resources during the COVID-19 pandemic era. The manuscript is well organized. Generally, I think that the paper is publishable in the World Journal of Clinical Oncology after some minor revision.

1.How many experts are invited to vote in the panel? 2.What’s the specific European and American clinical practice guidelines were used? 3.There is no need to put the votes in the tables.

SPECIFIC COMMENTS TO AUTHORS

This review by authors was conducted to elucidate the adaptation of international covid-19 and breast cancer guidelines to local context. This topic contains valuable concepts about the clinical science. The more discussion regarding the medical policy implications of the findings would be essential for the use of methodology in medical decision making is appreciated. A literature search was performed using PubMed, EMBASE and Cochrane Library Central database also suggested. I am pleased to suggest this manuscript for publication in the journal if the above suggestions are incorporated and the paper is thoroughly edited.

SPECIFIC COMMENTS TO AUTHORS

Name of Journal: World Journal of Clinical Oncology Manuscript type: Review Article

Manuscript Title: ADAPTATION OF INTERNATIONAL COVID-19 AND BREAST
CANCER GUIDELINES TO LOCAL CONTEXT Manuscript No. 59303 Comments:

The present manuscript contents some recommendations about oncological medical treatment of breast cancer in COVID-19 pandemic selected from three international clinical practice guidelines, which were reviewed and adapted to local context by a panel of experts from Peru invited by Peruvian Society of Medical Oncology, using levels of prioritization. The goal is adapting international guidelines to local context through best decision-makers, avoid duplication of efforts and optimize medical resources. The subject of this manuscript is of value, but there are a few of defects need to be modified.

1. Abstract section: COVID-19 should be defined, including virus caused, etc. 2. The terms about the virus are not uniform in the full text, such as: SARS CoV-2, SARS-CoV-2.

It should be uniformly changed to: SARS-CoV-2. Please check and modify. 3. There are a few of grammatical errors in this article. Core tip section: this manuscript content some recommendations about oncological medical treatment of breast cancer in COVID-19.....this should be changed to: This; content should be changed to: contents.....Please check the full text and correct them.

SPECIFIC COMMENTS TO AUTHORS

This is an interesting manuscript as it is a comprehensive guideline on the adaptation of international Covid19 and breast ca in this special times. Hopefully, this will eventual serve as a foundation for the management of breast ca without compromising the health services at this difficult time. However, there are a few issues in the manuscript that need to be addressed prior to publication. 1. How many patients were follow and involved int this study. 2. How does Covid infection affect the outcome of breast ca therapy in particualr those treatment delay after infected with Covid 19 ? 3. Does it have any impact on the prognosis after the treatment of breast ca?

This review by authors was conducted to elucidate the adaptation of international COVID-19 and breast cancer guidelines to local context. From the evidence-based medicine viewpoint, it contains valuable concepts about the clinical science. However, a literature search was performed such as using PubMed, EMBASE and Cochrane Library Central database are suggested to describe. The systematic review or meta-analysis approach is also suggested for this important issue. In addition, some references are also needed to update. Totally, I would like to congratulate the authors for the enthusiasm invested in this study. However, the manuscript does not reach the level of quality required for publication as review article in World Journal of Clinical Oncology. I regret that I am unable to accept in the current for, but may be resubmitted.
