To Whom It May Concern,

The manuscript and research project titled *"Effect of Pretreatment and Treatment Factors on Overall and Cause-Specific Survival for Mucoepidermoid Carcinoma of the Major Salivary Glands: A Surveillance, Epidemiology, and End Results (SEER) Analysis of 2,210 Patients"* has been supported in part with grant funding by the Community Cancer Fund.

We greatly appreciate our partnership and all this study will do to benefit cancer patients in future years.

Regards,
