### Nongenital Herpes Simplex Virus - American Family Physician

<https://www.aafp.org/afp/2010/1101/p1075.html> ▾

< **Diagnosis** Epidemiology Pathophysiology Cause Prognosis >

Nongenital herpes simplex virus type 1 is a common infection usually transmitted during childhood via nonsexual contact. Most of these infections involve the oral mucosa or lips (herpes labialis). The diagnosis of an infection with herpes simplex virus type 1 is usually made by the appearance of the lesions (grouped vesicles or ulcers on an erythematous base) and patient history. However, if uncertain, the diagnosis of herpes labialis can be made by viral culture, polymerase chain reaction, serology, direc...
