Dr. Matthew Thorne  
Editor  
Journal of International Medical Research

Dear Dr. Thorne,

Thank you very much for reviewing our article with a minor revision. O responses to the comments of reviewer 1 are as follows:

**Reviewer #1:** Please clarify the selection and exclusion criteria and the search results: how many literatures were found and how many was excluded by what reasons. Authors may add a figure of the selection tree.

[Per this recommendation, we have added the method section and Figure 1 to illustrate the search strategy and study selection criteria.](#)

In addition, we have updated the manuscript format according to the suggestion of science editor and editorial office director.

Sincerely,  
Amporn Atsawarungruangkit, MD
