**Idiopathic adulthood ductopenia with elevated transaminase only : A case report**

Zhang XC *et al.* IAD case report

**Abstract**

BACKGROUND

1 Idiopathic adulthood ductopenia (IAD) is a chronic cholestatic liver disease of unknown etiology that usually presents as unexplained jaundice. It is characterized by adult onset, lack of autoantibodies, inflammatory bowel disease and loss of interlobular bile ducts.

CASE SUMMARY

This case presents a 27-year-old woman with elevation of transaminases and alkaline
