RAS and Bradykinin: Where COVID-19 and ME/CFS Meet ...

<https://www.healthrising.org/blog/2020/10/10/ras...>

Oct 10, 2020 · The study, "A mechanistic model and therapeutic interventions for COVID-19 involving a RAS-mediated bradykinin storm", which was published in eLife Science Digests in July, blew a big hole in the ACE2 hypothesis for COVID-19 and ME/CFS. While it was doing that, though, it opened up even more intriguing connections.

Hemodialysis vs Non Hemodialysis COVID-19 outcome

#### Abstract

##### BACKGROUND

Coronavirus disease 2019 (COVID-19) is a highly contagious infection, caused by the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) virus, with a unique underlying pathogenesis. Hemodialysis (HD) patients experience high risk of contamination with COVID-19 and are considered to have higher mortality rates than the general population by most but not all clinical series. We aim to highlight the
