<https://www.sciencedirect.com/science/article/pii/S0301211598001742>

Jan 01, 1999 · O'Connell et al. in 1987, reported three patients with ovarian fibroma and elevated (above 35 IU/ml) CA125 levels.No details were given whether these patients also had Meigs' syndrome. Jones and Surwit reported a patient with Meigs' syndrome whose preoperative CA125 level was 226 IU/ml. Since then, 11 reports (14 cases) of Meigs' syndrome with elevated CA125 levels were reported 10. ...

## Meigs' Syndrome - an overview | ScienceDirect Topics

<https://www.sciencedirect.com/topics/medicine-and-dentistry/meigs-syndrome>

Meigs' syndrome is a benign solid ovarian tumor with the gross appearance of a fibroma with ascites and hydrothorax. Removal of the tumor promptly cures the ascites and hydrothorax. The histology would be a fibroma, thecoma, or granulosa cell tumor [24] When other benign ovarian teratomas or cysts are present rather than a fibrous tumor it is called pseudo-Meigs' syndrome

<https://www.sciencedirect.com/science/article/pii/S0301211598001742>

Jan 01, 1999 - Benign fibromas may be associated with ascites and a right pleural effusion, the triad known as Meigs' syndrome. In 1954 Meigs reviewed 122 cases of abdominal or pelvic lesions with ascites and hydrothorax and found 84 typical cases of Meigs' syndrome. He proposed to limit true Meigs' syndrome to benign and solid ovarian tumors (fibroma, thecoma and granulosa cell tumor) accompanied by ascites and hydrothorax. ...
