We report a case where a large arachnoid cyst was treated by marsupialization and was complicated by remote intraparenchymal hemorrhage and a **spinal subdural hematoma**. History and Presentation A 6-year-old, otherwise healthy boy, presented with a chronic history of generalized headache, which had persisted despite strong analgesia.

One of the rare complications after rapid decompression of the arachnoid cysts is hemorrhage in surrounding brain. We describe a case of intraparenchymal hemorrhage as a **rare complication** after surgical decompression of a sylvian fissure arachnoid cyst. A **15-year-old right-handed female presented with intractable generalized headache**.
