SPECIFIC COMMENTS TO AUTHORS

World Journal of Clinical Cases - Manuscript review of Manuscript NO: 59869
Intraparenchymal hemorrhage after surgical decompression of an epencephalon
arachnoid cyst-Case Report Dear Author, First of all, thank you for submitting your
manuscript to the World Journal of Clinical Cases. This is an interesting case. However,
it looks like written in a hurry and needs some improvement and correction. 1 First
of all, it is written and structurized according to the provided guidelines for manuscript
writing of World Journal of Clinical Cases (first page, core tip, case report paragraphs etc.
are missing - please check <https://www.wjgnet.com/bpg/GerInfo/187> . 2 Some
language polishing needed (some spelling mistakes, language style as well). 3 Line 63 -
MRI, line 74 CT - please explain the abbreviations. 4 Line 78 - what conservative
treatment was applied? How long it took to recover? 5 Is a follow up needed for this
patient? 6 Although it is a rare case, it is not new or challenging. 7 Did the patient
have any risk factors that coulcl cause arrachboid cyst (trauma etc.)? 8 What was your
differential diagnosis before the MRI scan? 9 Line 134 - "Consent for publication" -
incomplete sentence. 10Line 135 - looks like you forgot to correct the journal name you
are applying to "All authors have approved the manuscript and agree with submission
to Jounal of Chinese Neurosurgical Journal ". 11 Finally, it looks like resubmitted after
previous rejection from another journal according to that journal's requiremets and not
the one you are now applying.
