[EUS-guided coil versus cyanoacrylate therapy for the ...](#)

<https://www.sciencedirect.com/science/article/pii/S0016510713018865>

Nov 01, 2013 · EUS-guided therapy for gastric varices using cyanoacrylate injection or coil deployment is effective. EUS-guided coil deployment requires fewer endoscopic sessions. • Coil deployment tends to have a lower adverse event rate, especially a lower rate of embolism. EUS-guided procedures can be safely performed in cases of active bleeding.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6986946>

Current endoscopic therapies are premised on cyanoacrylate injection which is technically challenging and carries risk of embolization. We present a case series of endoscopic ultrasound (EUS)-guided coil injection in combination with hemostatic absorbable gelatin sponge (AGS) for treatment of bleeding gastric varices.

<https://www.mdpi.com/2077-0383/8/11/1786/htm> ▾

Background and Aims: **Gastric varices** (GVs) occur in 20% of patients with portal hypertension. GV's are associated with a 65% risk of bleeding over the course of 2 years and have a mortality rate of up to 20%. The standard treatment for GV's is obliteration with **cyanoacrylate** (CYA). This study presents our experience with combined therapy (vascular **coils** and CYA) under **endoscopic** ...
