SPECIFIC COMMENTS TO AUTHORS

The authors described very well an interesting case report as reported in the title of manuscript. All information were provided and the case is very interesting. Both the quality and quantity of images are nice. However, we would like to invite the authors to consider the following suggestion: Minor Comments: 1) The authors performed also the IHC staining regarding CMV infection. We are thinking that an additional iconography, reporting the IHC images of CMV positivity, could be appreciated in order to increase the soundness of manuscript.

SPECIFIC COMMENTS TO AUTHORS

The case report is interesting and well written. The images are very good. Only in figure 2 you need to use arrows on the lesion in 2B ,2C ,2D for more demonstration

Short title: need to be changed to : Vedolizumab in Crohn's disease with rectal fistulas and presacral abscess
