[Heart failure management of the elderly patient: focus on ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6926414>

Sarcopaenia **and cachexia in heart failure**. Skeletal muscle is frequently abnormal in HF syndromes and this weakness and wasting can be severe. When isolated to muscle it is termed sarcopaenia, but when it affects all body also fat and bone tissue it is commonly termed **cachexia** (clinically defined as unintentional weight loss, with or without skeletal muscle wasting, of at least 5% of baseline ...

[Muscle Wasting and Sarcopenia in Heart Failure-The Current ...](#)

<https://pubmed.ncbi.nlm.nih.gov/32911600>

The prevalence of **sarcopenia** in chronic **heart failure** (HF) **patients** amounts to up to 20% and may progress into cardiac **cachexia**. Muscle wasting is a strong predictor of **frailty** and reduced survival in HF **patients**. Despite many **different** techniques and **clinical** tests, there is still no broadly available gold standard for the diagnosis of **sarcopenia**.
