SPECIFIC COMMENTS TO AUTHORS

Dear author, thank you for submitting your interesting observation in the journal. As we know psoriasis is a chronic relapsing and remitting skin disease with various clinical presentation. Now psoriasis is understood as a chronic immunological disorder that is associated with metabolic syndrome. The manuscript's title, abstract and introduction were crisp and informative. Kindly do some important changes in your manuscript- 1. Dear author, you should also mention the basic investigations of your both patients like complete hemogram, liver and kidney profile with electrolyte especially the serum calcium level. You should also elaborate the precipitating factors and pathogenesis of pustular psoriasis. 2. I will suggest that you should also make a table of common differentials of pustular psoriasis in discussion. Best wishes & Regards.
