# Celiac Disease

Medical Condition

A chronic immune mediated disorder triggered by gluten ingestion.

- 📊 Common (More than 200,000 cases per year in US)
- 🧪 Often requires lab test or imaging
- 💊 Treatments can help manage condition, no known cure
- 🕒 Can be lifelong

Caused due to the immune reaction against gluten Symptoms include vomiting, appetite loss, bloating and constipation The best approach is to follow gluten free diet.

## Symptoms

The signs and symptoms may vary between children and adults. Mild cases do not show any symptoms.

Some of the common typical signs and symptoms of celiac disease include -

- Vomiting
- Poor appetite
