

Dear Reviewer,

Hello! Thank you very much for your reply and review report. Based on your comments and requirements, we revised the original contents accordingly.

First of all, we supplemented STAT6 knowledge and cited papers from Yoshida A et al.

Secondly, we added high-definition STAT6-related immunohistochemical image and high-definition H-E staining image.

Thirdly, we modified the conclusion part to present a more specific one.

Fourthly, we proofread the paper and revised the format to further standardize it.

Fifthly, we changed the format of References and gave relevant PMID and DOI numbers for overseas papers, but failed to do so with the cited Chinese literatures since they had not been assigned with such numbers.

Sixthly, we submitted the audio files that describe the final core prompt.

Please feel free to reach out to us if there is any doubt. Thanks for your time and patience!

Sincerely yours,

Zhao-hui Liu
