**Fertility-sparing surgeries without adjuvant therapy through term pregnancies in patient with Low-grade Endometrial Stromal Sarcoma: A case report and literature review**

Fertility-sparing surgeries of LGESS through deliveries

## Abstract

### BACKGROUND

Low-grade endometrial stromal sarcoma (LGESS), a rare tumor, is an indolent tumor with a favorable prognosis. With the importance of improving quality of life recognized, fertility-sparing surgery may be an option for those young women. However, most of the reports suggested that stage IA patients may be candidates for fertility-sparing surgery, and adjuvant hormonal treatment was considered as a feasible
