

PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 60719

Title: Analysis of the clinicopathological features of superficial CD34-positive fibroblastic tumor

Reviewer's code: 03547628

Position: Peer Reviewer

Academic degree: DNB, MD, MNAMS

Professional title: Associate Professor

Reviewer's Country/Territory: India

Author's Country/Territory: China

Manuscript submission date: 2020-11-11

Reviewer chosen by: Chen-Chen Gao

Reviewer accepted review: 2020-12-08 10:22

Reviewer performed review: 2020-12-10 04:08

Review time: 1 Day and 17 Hours

Scientific quality	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Very good <input checked="" type="checkbox"/> Grade C: Good <input type="checkbox"/> Grade D: Fair <input type="checkbox"/> Grade E: Do not publish
Language quality	<input type="checkbox"/> Grade A: Priority publishing <input type="checkbox"/> Grade B: Minor language polishing <input checked="" type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
Conclusion	<input type="checkbox"/> Accept (High priority) <input type="checkbox"/> Accept (General priority) <input checked="" type="checkbox"/> Minor revision <input type="checkbox"/> Major revision <input type="checkbox"/> Rejection
Re-review	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Peer-reviewer statements	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

SPECIFIC COMMENTS TO AUTHORS

1. Kindly enumerate immunomarkers used by you to rule out other soft tissue tumors and explain how each marker was used to rule out the other tumors instead of writing "Other markers included EMA, p53, vascular endothelial markers, myogenic markers, melanin markers, dendritic cells and histocyte markers, and leukocyte markers, which were all negative. The proliferation index of Ki-67 was low, typically less than 2%" in discussion.
2. Language editing should be carry out throught-out the manuscript. many spelling mistakes like for histiocyte- u have typed histocyte should be rectified.
- 3.mention of mitotic count should be done per 50 hpf. Ofcourse, it should be less than 1/50 but in discussion you have mentioned mitosis was rare. please be specific.
