[Drug-Induced Liver Disease | ScienceDirect](https://www.sciencedirect.com/book/9780123878175)

<https://www.sciencedirect.com/book/9780123878175>

Drug-induced liver injury is an important clinical entity, which can be grouped into cholestatic **liver injury**, hepatocellular **liver injury**, and mixed **liver injury**. Cholestatic **liver injury** is characterized by a reduction in bile flow and the retention within hepatocytes of cholephilic compounds such as bile salts that cause hepatotoxicity.
