Nocardia Infection in a Bronchopulmonary Sequestration - CHEST

[https://journal.chestnet.org/article/S0012-3692\(16\)53279-6/fulltext](https://journal.chestnet.org/article/S0012-3692(16)53279-6/fulltext)

A case of **intralobar bronchopulmonary** sequestration is reported in which the sequestered lung was infected with *Nocardia* sp. Although recurrent pyogenic infections are common in pulmonary sequestrations, this is the first case report with documented nocardiosis. Bronchopulmonary sequestration is an uncommon disorder.

<https://academic.oup.com/ejcts/article/27/1/28/343357> ▾

Jan 01, 2005 · Pulmonary sequestration (PS) is an uncommon congenital disease. Symptoms, when present are usually secondary to superimposed infections which are usually pyogenic in nature . Other superimposed infections are extremely rare: Savic et al. reported six cases associated with tuberculous and one nocardia infection in 540 published PS cases. Superimposed fungal infection has been ...
