Child-Pugh Versus MELD Score for the Assessment of ...

<https://journals.lww.com/md-journal/Fulltext/2016/...>

Introduction

Methods

Results

Discussion

Liver cirrhosis has a high morbidity and mortality, which is the 14th most common cause of death all over the world and the 4th in central Europe. It leads to 1.03 million deaths per year in the world,¹ and 170,000 deaths per year in Europe.² The prevalence of liver cirrhosis may be underestimated, because patients at the early phase of liver cirrhosis are often asymptomatic, and most of patients with liver cirrhosis are admitted due to its related complications. The 1-year mortality of liver cirrhosis varies greatly from 1% t...
