Dear editor

Hope this finds you well

Re: Biostatistics Review Certificate “Global research trends in microbiome-related to irritable bowel syndrome: a bibliometric and visualized study”

The statistical methods of this study were reviewed by a member of bibliometricians and biomedical researchers. As a matter in fact, the first, fourth, and fifth authors (Sa’ed Zyoud, Waleed Sweileh, and Samah Al-Jabi) of this paper are one of the experts in this field worldwide and published more than 80 articles in the scientometric field. They have reviewed the manuscript in all processing of analysis.

Should you require any additional information please do not hesitate to contact me.

My regards

Sa’ed H. Zyoud
