

## **Peer Review Report:**

### Reviewer 1:

Dear Reviewer, we appreciate your review of our manuscript and your comments. Thank you for pointing out the typos within the manuscript. We have since reviewed the content thoroughly and believe all issues are resolved.

### Science Editor Comments:

Dear Science Editor, we welcome your review and feedback on our submitted manuscript. We have changed the style and formatting of our paper to match the "minireview" format. We appreciate your recommendation to provide figures as editable files and have now updated our submission. Original figure and tables generated for the manuscript are now included as a power point file, which should allow text and re-arrangement edits as needed.
