SPECIFIC COMMENTS TO AUTHORS

Well written manuscript about atypical site of metastasis. The language and grammar needs minor improvement. The comments are listed: 1. Avoid short forms in abstract or mention them completely first. Mention complaints and presentation followed by past history. 2. Expand the Introduction in terms of tumors of seminal vesicles and metastasis to it. 3. T4N1M1. The tumor was already M 1 with a retroperitoneal mass. Provide the complete details. One statement mentions 'hemicolectomy' and other 'ilectomy'. Use consistent terminology. 4. Use generic names of drugs in treatment with full forms. (esp first time) 5. It will be better to put presentation and clinical details first, followed by past history and investigations to arise interest in reading. 6. What was the status of tumor margins ? Was it R0 or R1 resection due to its proximity with ureter ? 7. Mention the stain used and magnification for the images. 8. What is the follow up of this patient and current status ? 9. One statement mentions 'laparoscopic resection' and other 'excision biopsy'. Be consistent. It is not mentioned in case discussion that the plan was excision biopsy. 10. Discussion needs minor corrections for syntax. 11. Mention few atypical tumors and any mentioned metastasis to seminal vesicles (in literature) to enhance the discussion about this atypical metastasis to seminal vesicle.

SPECIFIC COMMENTS TO AUTHORS

The authors aimed to present a case report entitled "Single solitary seminal vesicle metastasis from ileal adenocarcinoma presenting with haemospermia". The clinical aspects have been fully supported by the required information. However, due to the importance of tumor biology and Cancer Genetics, the following comments are provided: 1-Page 5- Fig 2. The percentage of positive cells is important to be considered for IHC and its impact on the clinical managements. 2-Page 6. Fig 3. The percentage of positive cells is important to be considered for IHC and its impact on the clinical managements. The diverse expression pattern is remarkable in this figure.
