**Should we resect colorectal cancer in patients over the age of 85?**

Flynn *et al.* Colorectal surgery in the elderly

**Abstract**

**BACKGROUND**

The prevalence of colorectal cancer in the elderly is rising, with increasing numbers of older patients undergoing surgery. However, there is a paucity of information on the surgical outcomes and operative techniques used in this population.

**AIM**

The aim of the study was two-fold: to evaluate the post-operative outcomes for
