Associate Director, The Celiac Disease Program  
Instructor of Pediatrics, Harvard Medical School  
Boston Children's Hospital

Re: Incidence and Clinical Characteristics of Nonresponsive Celiac  
Disease in Children on a Gluten Free Diet

Dear Dr. Weir,

Thank you for the opportunity to collaborate with you on this important research study on nonresponsive celiac disease in children on a gluten free diet. I have reviewed the manuscript to ensure that all the statistical analysis I did for this project has been correctly represented in the text, tables and figures.

As you know, I am a biostatistician with over 25 years of experience in clinical research, currently employed at the Institutional Centers for Clinical and Translational Research (ICCTR), Boston Children's Hospital. The Biostatistics Core of the ICCTR is comprised of approximately 20 biostatisticians with a broad range of expertise and experience who are at my disposal for consultation and support.

I look forward to the opportunity to collaborate with you on future celiac disease research.

Sincerely,

Paul D. Mitchell
