## Diabetes mellitus increases risk for colorectal adenomas ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4051936>

Jun 14, 2014 · Type 2 diabetes mellitus (DM), a state of hyperinsulinemia, is associated with **increased risk** of colorectal neoplasia including colorectal cancer (CRC) and its precursor colonic adenomas. It is unknown if patients with DM require more aggressive screening than patients at average risk for CRC.

Cited by: 19

## Metformin Use and Risk of Colorectal Adenoma after ...

<https://cebp.aacrjournals.org/content/24/11/1692> ▾

Nov 01, 2015 · Background: Existing literature suggests that metformin, the most commonly used biguanide, may lower colorectal cancer risk. Because most colorectal cancers originate in precancerous **adenomas**, we examined whether metformin use lowered colorectal **adenoma** risk after polypectomy in patients with **type-2 diabetes**. Methods: Retrospective cohort study of 40- ...
