

## Responses to Editor and Reviewers:

### Editor's note:

1. The authors did not provide the approved grant application forms. Please upload the approved grant application forms or funding agency copy of any approval documents.

Response: Thank you for your kind suggestion. According to your comments, we have uploaded the approved grant application forms.

2. The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by editor.

Response: Thank you for your kind suggestion. According to your comments, we have organized the figures into PowerPoint files and upload them.

3. The title of the manuscript is too long and must be shortened to meet the requirement of the journal (The title should be no more than 18 words).

Response: Thank you for your kind suggestion. According to your comments, we have shortened the title to 16 words.

### Reviewers' comments:

1. The background section of the main text is brief. I suggest adding more facts regarding the DORV prevalence, diagnosis, long term complications, and management. Since DORV is a rare condition, it would be better to mention these facts to make the article more comprehensive.

Response: Thank you for your kind suggestion. According to your comments, we have enriched the background and introduction section, adding some facts about the DORV prevalence, diagnosis, long term complications, and management.

2. The language needs some revisions as I managed to encounter some grammatical faults. I suggest having it revised by someone fluent in English.

Response: Thank you for your kind suggestion. According to your comments, we have corrected the grammatical faults, the manuscript has been revised by a English editing organization, and then checked by a English teacher from Sichuan University.
