#### **SPECIFIC COMMENTS TO AUTHORS**

This is an interesting case and topic, however, attaching patient clinical breast pics, and MRI shall be of huge impact. What was the detailed exact surgical procedure done?

#### **SPECIFIC COMMENTS TO AUTHORS**

Diabetic mastopathy represents an uncommon tumor-like proliferation of fibrous tissue of the breast that usually occurs in patients who suffered from type 1 diabetes mellitus for a long time. So which type diabetes in this patient? The Case presentation should be concise. Mammography haven't showed in the Figure. More new and representative literature should be included in the discussion. The language should be polished, even the title.
