Digestive system involvement of novel coronavirus ...

<https://onlinelibrary.wiley.com/doi/full/10.1111/1751-2980.12862>

A literature review has shown that the **SARS-CoV-2** and the SARS that broke out in 2003 belong to the same β -**coronavirus** family and possess highly similar genomes. 24 In addition, the receptors for both SARS and **SARS-CoV-2** is ACE2. 25 Therefore, it is not difficult to understand why **SARS-CoV-2** may give rise to **digestive system** ...

Involvement of digestive system in COVID-19 ...

<https://journals.sagepub.com/doi/full/10.1177/1756284820934626>

Jun 18, 2020 · The receptor of SARS-CoV-2, angiotensin converting enzyme 2 (ACE2), has been found to be highly expressed both in GI epithelial cells and liver, suggesting a direct damage potential of SARS-CoV-2 on livers. 16 Almost the entire GI tract, including stomach, duodenum, small intestine and rectal epithelial cells were found to have viral nucleocapsid protein of **SARS-CoV-2** and ACE2 protein ...
