Investigation of the efficacy and safety of tenofovir disoproxil fumarate agents in the treatment of Chinese chronic hepatitis B patients: Results obtained from a 96-week-long, multicenter, double-blinded, double-dummy, clinical trial

Qingzhong vs Viread in CHB patients

**Abstract**

BACKGROUND

Tenofovir disoproxil fumarate (TDF) is a prodrug of a nucleotide analogue. As an antiviral drug, TDF has been proposed in the first-line treatment of chronic hepatitis B (CHB). Qingzhong, the brand name of TDF, commercialized by Jiangsu Chia-tai Tianqing Pharmaceutical Co Ltd., and Viread, another brand name of TDF,

<https://pubmed.ncbi.nlm.nih.gov/28404091>

In **patients** with HIV, **tenofovir** alafenamide was as efficacious as **tenofovir disoproxil fumarate**, with reduced bone and renal toxic effects. We compared the efficacy and safety of the two drugs in **patients** with HBeAg-positive **chronic hepatitis B** virus (HBV) infection in a non-inferiority study.
