### Cardiovascular mechanisms of SSRI drugs and their benefits ...

<https://www.researchgate.net/publication/234157874...>

Patients with **schizophrenia** (SCZ) are at high risk of **cardiovascular disease** (CVD) due to an inherited predisposition, a sedentary life style and the use of antipsychotic medications.

### SSRIs, SNRIs and Cardiovascular Risk | College of Pharmacy ...

<https://www.pharmacy.umn.edu/.../ssris-snr-is-and-cardiovascular-risk> ▾

Of the **SSRIs**, paroxetine, sertraline, escitalopram and fluoxetine have the highest affinity for the serotonin transporter and are most likely to decrease platelet activity, reduce clotting and increase bleeding **risk**. Of the **SNRIs**, venlafaxine and duloxetine have the most data available **for cardiovascular** risks.
