February 24, 2021

To Whom It May Concern,

My name is Enrique (Harry) Rodger, and I am an Irish-Argentine double nationality citizen.

I am a Chemistry Licentiate, graduated at Universidad de Buenos Aires, Argentina

From 1991 to 2020 I worked at St. George's College North, an Anglo-Argentine International School teaching Chemistry in English, as well as other subjects such as Physics, Theory of Knowledge, and Design Technology.

Also, since 1998 I work for the International Baccalaureate Organization (www.ibo.org) in several roles. As a Chemistry Examiner, I mark scripts and moderate laboratory practical investigations for prospective Diploma Programmer candidates. Also, as Deputy Chief Examiner I wrote and edited exam papers in English for two sessions. I also revised the technical aspects of paper translations and documents such as the Design Technology Guide and Teacher Support Material.

I am a Board member of the Argentine Chemical Association (Asociación Química Argentina), in charge of the Institutional Relations, and a member of the American Chemical Society.

Since the beginning of 2020 I joined the team of professionals at the Hospital de Gastroenterología Dr. Carlos Bonorino Udaondo - Sección Hepatología, as a technical English language advisor, helping with the publication of:

Safety of Chronic Simvastatin Treatment in Patients with Decompensated Cirrhosis: Many Adverse Events But No Liver Injury, recently published in Digestive Diseases and Sciences.

Best regards,

Chemistry Licentiate

Hospital de Gastroenterología Dr. Carlos Bonorino Udaondo – Sección Hepatología
