

Dear Editor,

We would like to thank World Journal of Clinical Cases for giving us the opportunity to revise our manuscript.

We thank the reviewers for their careful read and thoughtful comments on previous draft. We have carefully taken their comments into consideration in preparing our revision.

Below is our response to their comments.

(1) The “Author Contributions” section is missing. Please provide the author contributions.

We have added author contributions, see title page.

(2) PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references.

We have added the PubMed numbers and DOI citation numbers to the reference list and listed all authors of the references.

Four references were missing DOI citation numbers, all from *Pain Physician*. We couldn't find their DOI citation numbers from the pubmed.
