<https://www.sciencedirect.com/science/article/pii/S1424390320307857>

Dec 01, 2020 Pancreatic endoscopy during the COVID-19 pandemic: Pancreatic endoscopy, in the wake of the COVID-19 pandemic, is a debatable option that the endoscopist needs to assess considering all the pros and cons. Endoscopy, being an aerosol generating procedure, poses a high risk for the operating endoscopist and assisting technical staff.

Pancreatic cancer in the era of COVID-19 pandemic: Which one is the lesser of two evils?

Moslim MA *et al.* Pancreatic cancer and COVID-19

Maitham A Moslim, Michael J Hall, Joshua E Meyer, Sanjay S Reddy

Abstract

Pancreatic adenocarcinoma remains one of the deadliest malignancies affecting the older population. We are experiencing a paradigm shift in the treatment of pancreatic cancer in the era of coronavirus disease 2019 (COVID-19) pandemic. Utilizing neoadjuvant treatment and further conducting a safe surgery while protecting patients in a controlled environment can improve oncological outcomes. On the other hand, an
