

PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 62026

Title: Prevention of late complications with coverage agents in endoscopic resection of colorectal lesions: current landscape in gastrointestinal endoscopy

Reviewer's code: 03026925

Position: Peer Reviewer

Academic degree: MD, PhD

Professional title: Chief Doctor

Reviewer's Country/Territory: Japan

Author's Country/Territory: Spain

Manuscript submission date: 2020-12-27

Reviewer chosen by: AI Technique

Reviewer accepted review: 2020-12-29 14:54

Reviewer performed review: 2020-12-30 02:41

Review time: 11 Hours

SPECIFIC COMMENTS TO AUTHORS

The authors conducted a review of the prevention of late complications with coverage agents in endoscopic resection of colorectal lesions. For preventing the adverse events such as delayed bleeding, perforation, or PECS, we can choose various devices; endoclip, a suturing device, or application of a coverage agent or endoscopic shielding technique. There is no consensus of an optimal strategy of it, and we cannot solve these unfavorable outcomes yet. The authors reviewed mainly the application of biocompatible medical device by using a comprehensive search of PUBMED. This study is almost well-written and will be so useful for readers and endoscopists in clinical situation. There are comments below.

1. In table 2, the authors should discuss about the cost-effectiveness.
2. In table 2, the criteria of positive or negative of the healing activity by using each device is unclear. Delete or more discussion will be needed for confirming their opinion.
3. They should discuss about the biological safety of each device.
