

Dear Ke-Qin Hu and Koo Jeong Kang,  
Editors-in-Chief  
*World Journal of Hepatology*

30th of January 2021

Dear editors,

We would like to thank you and the reviewers for the helpful and insightful comments about our manuscript. We are grateful for the opportunity to further amend our work. We have carefully revised our manuscript according to the reviewer's comments, which we believe have contributed to enriching the paper. Below you will find our point-by-point response to **all** the reviewers' suggestions, as well as the corresponding changes in the full text. In doing so, the manuscript we re-submit to you is much improved. We hope it will now be suitable for publication in World Journal of Hepatology.

#### REVIEWER COMMENTS

##### *Reviewer 1:*

1. Please revise the title, which seems too long.

Title has been adapted.

2. Please revise the running title. The suggested title could be "AHD WITH BRAIN MANGANESE DEPOSITS IN A METASTATIC NET".

Running title has been changed to the proposition.

3. Please define the keywords based on MeSH terms.

All keywords are based on MeSH terms.

4. The background is too long. Please focus on the attractions and the novelty of case. Details on the characteristics' of the NET and their specific treatment modalities adverse effects would be addressed in discussion section.

Introduction was shortened and the discussion was corrected accordingly. Please do not hesitate to tell us if needs to be further summarized.

5. Please refer to the pre-operations data regarding patients liver function tests and explain if the patient has any signs for Wilson disease.

The liver function tests were changed thanks.

6. Please define the abbreviations (SSA and PRRT) in introduction part.

SSA and PRRT detailed in the introduction.

7. Please define if any opioids were prescribed for pain relief.

The patient did not take opioids for pain relief. Pain was controlled with non-opioid analgesics.

8. Please explain the main findings and novelty of the case in the first paragraph of discussion.

We have included the novelty of our case in the first paragraph of the discussion.

Thanks again for all the feedback. We have thoroughly checked the entire manuscript.

We hope that our improved manuscript focusing on an interesting case of AHD in a long-survivor metastatic NET is suitable now for publication in World Journal of Hepatology and we really look forward to seeing it in print.

With best wishes.

Yours truly,

Oriol Mirallas
