**Scientific Quality:** Grade C (Good)

**Language Quality:** Grade B (Minor language polishing)

**Conclusion:** Minor revision

**Specific Comments to Authors:** In this paper, the authors retrospectively included and analyzed the clinical information and treatment history of 11 patients diagnosed with Paget's disease of bone in a single centre. It is of interest to recognize the more detailed clinical information of PDB in Chinese population. However, there remained some minor problem needed to be solved.

1. What's the ratio of Monostotic and polystotic bone deformation in the 11 patients?

Response: Thank you for your question. Four patients had monostotic bone deformation and seven patients had polystotic bone deformation. We have supplemented it in line 82-83.

2. It could be better to take the treatment and follow up of each patients summarized in a table.

Response: Thank you for your advice. We have summarized the treatment and follow up in table 2.

3. In line 93, the tumors should be tumours

Response: Thank you for your advice. We have changed the word "tumors" into "tumours".

4. In line 97, the localised should be localized

Response: Thank you for your advice. We have changed the word " localised " into "localized".

5. In line 51, what is exact number of most of 11?

Response: Thank you for your question. The number is 10, and we have added it in line 35.
