

**Minor comments :**

1. Update on the WHO classification of lymphoid neoplasms is given in the later 2016 version (Swerdlow SH et al., Blood 127(20):2375-2390). Authors used the older 2008 version.

We have updated it in the article.

2. Page 9, please provide manufacturer of the ALK breakapart probe used in the assay.

We have added manufacturer of the ALK breakapart probe in the article.

3. Page 10, t(2;17)(p23;q23).

It has been modified in the article.

4. References- Use first 6 authors followed by et al.

The format of references in the magazine is fixed. All authors will be listed automatically. I can't change it by myself.

5. Minor word spacings are needed. Many words are joined together.

It has been modified in the article.

Thank you for all advice!
