[Hepatic Metastasis as an Initial Manifestation of Salivary ...](https://www.researchgate.net/publication/23440730...)

<https://www.researchgate.net/publication/23440730...>

We report a case of a 51-year-old Caucasian Greek woman who presented to our hospital with liver metastases as the first manifestation of an adenoid cystic carcinoma of the left submandibular gland.

[Primary Adenoid Cystic Carcinoma of the Liver: Case Report ...](https://www.sciencedirect.com/science/article/pii/S1665268119303242)

<https://www.sciencedirect.com/science/article/pii/S1665268119303242>

Jan 01, 2019 - Adenoid cystic carcinoma (ACC) is an uncommon tumor primarily occurring in the salivary glands and is relatively rare in other sites. In the liver, only one primary adenoid cystic carcinoma has been reported in the English literature. Here we presented a primary hepatic adenoid cystic carcinoma in a 44 years old male.

Sep 26, 2019 - Adenoid cystic carcinoma is an uncommon malignant neoplasm of the salivary gland. Liver metastasis from salivary gland cancer is a rare situation. In this article, we report the case of a 29-year-old woman treated 5 years previously for adenoid cystic carcinoma of the parotid gland by surgery and radiotherapy, who presented for a large hypervascularized hepatic metastasis of 20 cm.

Adenoid cystic carcinoma

Rate Type

Adenoid cystic carcinoma is a rare type of cancer that can exist in many different body sites. This tumor most often occurs in the salivary glands, but it can also be found in many anatomic sites, including the breast, lacrimal gland, lung, brain, Bartholin's gland, trachea, and the paranasal sinuses.
