

Dear Dr. Ma:

I thank you for inviting us to revise our manuscript (Manuscript NO: 62429, Case Report).

The reviewer comments have been carefully studied, and the manuscript has been revised accordingly. In addition to the text changes, I added a coronal section CT scan, as requested by the Reviewer #1, as Fig. 1B. During the revision, I also noticed and fixed an error in Fig. 2 (immunostaining).

I thank you again for inviting us to revise our manuscript, and hope that you will find the revised manuscript now suitable for publication in *World Journal of Clinical Cases*.

Sincerely yours,

Bingmu Fang, Chief Physician

Department of Hematology

Point-to-point responses

Reviewer #1

1 Overall, the manuscript is very well written and highly relevant to clinical practice. The case highlights a challenging case of anaplastic large cell lymphoma masquerading as a pulmonary infection. The case report is interesting and well described by the authors. The discussion section is very thorough review of literature and appropriately highlights the disease in discussion. Overall an impressive case reports.

Author response: I appreciate the encouraging reviewer comment.

2. There is some redundancy in the case report discussion which can be removed (see tracked changes in the manuscript).

Author response: I appreciate the reviewer comment. Specific comments in the manuscript as tracked changed have been carefully studied. Redundancy in the Discussion section has been removed.

3. English grammar can be improved.

Author response: I worked with a professional medical editor to revise the entire manuscript to improve English language structure and grammar. A few typographical errors have also be noted and fixed.

4. Add coronal section of CT chest showing multiple nodules as mentioned in the text.

Author response: I added a panel to Figure I, showing the coronal section of chest CT scan.

Science editor:

1. The authors need to provide written informed consent provided by the patient.

Author response: I have now submitted a copy of written informed consent.

2. The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor.

Author response: I have now submitted the 2 figures as independent figures using PowerPoint instead of inserting the figures in manuscript as boxes.

3. The authors did not provide the approved grant application form(s). Please upload the approved grant application form(s) or funding agency copy of any approval document(s).

Author response: I have now submitted the cover page of the approved grant application. The supporting agency and grant number have been added to the manuscript.

4. The reference cited in the text should be put in the square bracket, and then make them be superscript.

Author response: I apologize for not conforming to the format requirement by the journal. Reference citations in the main text now appear as superscript in square bracket.

Company editor-in-chief:

1 Before its final acceptance, the author(s) must provide the Signed Informed Consent Form(s) or Document(s). For example, authors from China should upload the Chinese version of the document, authors from Italy should upload the Italian version of the document, authors from Germany should upload the Deutsch version of the document, and authors from the United States and the United Kingdom should upload the English version of the document, etc.

Author response: I have now submitted signed informed consent form, in the Chinese language.

2. Before final acceptance, the author(s) must provide the English Language Certificate issued by a professional English language editing company.

Author response: The manuscript has been edited by the Ivy Editing, a professional English language editing company having operations in China. A certificate has been submitted.
