

Dear Editor, Please find enclosed the resubmitted revised manuscript for the mini-review titled; Gastrointestinal manifestations of systemic sclerosis: an updated review

Manuscript NO.: 62772

We have read thoroughly all the reviewer comments with the constructive criticism which I do respect for the perfection of the manuscript. We have taken all comments into consideration and we answered the questions and revised the text accordingly (all changes are highlighted in bold).

I am herewith attaching the revised manuscript and the point to point replies to the reviewers. I always do appreciate very much your support. With my best regards, Sincerely, Andres Gomez Aldana

Reply to reviewers:

1. This review is redundant and the readability is not good. The section "Immunological alterations in GI and SSc compromise" should be deleted.
Answer: It was deleted from the main archive

2. There is a part that describes organ other than the GI tract. The section "Liver" and Flowcharts 1 and 2 should be deleted as well. It is better to remove the liver part from Table 1. Both sections were deleted from the articles

3. Figure 1. is confusing. Please delete it. It was modified

4. There are too many abbreviations. For example, ID and EB. What do these mean?
Both abbreviations were deleted

Second reviewer

1. MEAR abbreviation has not been explained. It was deleted
2. The spelling of acotiamide needs correction. It was corrected

Reply to re-reviewers:

The figure 1 has been deleted. Both abbreviations were deleted
