Observational Study

Inflammatory bowel disease in Tuzla Canton in Bosnia-Herzegovina: A prospective 10-year follow-up

Ten-year follow-up of IBD in Tuzla Canton, B&H

Abstract

BACKGROUND

Inflammatory bowel diseases (IBD) incidence and prevalence vary between regions but have risen globally in recent decades. A lack of data on IBD epidemiology from developing nations limits the understanding of IBD epidemiology.

AIM

To perform a follow-up review of IBD epidemiology in the Tuzla Canton of Bosnia

Jun 12, 2008 · Bosnia and Herzegovina (B&H) is one of the Eastern European countries with lacking data on Crohn's **disease** (CD) epidemiology. We aimed to assess incidence of CD in **Tuzla Canton** of B&H during a 12-year period (1995–2006). We retrospectively evaluated hospital records of both CD inpatients and outpatients residing in **Tuzla Canton** of B&H (total of 496,280 inhabitants) between 1995 and 2006.
