SPECIFIC COMMENTS TO AUTHORS

This is a case report for a patient with pelvic lipomatosis with cystitis glandularis was treated by transurethral resection of bladder tumour (TUR-BT) and oral administration of celecoxib. This case reports unique findings and is theoretically based on the current literature. The subject is very important to clinical Urology practice. The case is well written and provides useful information for the readers. There are however some additional information needed minor editing and revision of the manuscript. Line 85: please correct "with" Line 220: do you mean "sensitivity"? for the literature review part, I would suggest to include a table for the previously reported cases.
