

We thank suggestive comments from reviewers. We revised manuscripts according to comments from reviewers as described below.

Response to Reviewer 1

1 Key word colitis is missing in abstract.

Together with the comment from Reviewer 2, we deleted colitis and instead added plasma exchange in Key words.

2 Is there any alternative for Cyclophosphamide?

Azathioprine and rituximab can be the alternative treatment for granulomatosis with polyangiitis. We added following sentences in Discussion.

“Because continuation of CPA is difficult in patients who experienced CPA-induced enteritis, rituximab or azathioprine can be the alternative treatment for GPA.”

Response to Reviewer 2

1 Major revision Please add the details of supportive therapies such as replenishment of albumin and gamma globulin and plasma exchange in Abstract section and "plasmapheresis" or "plasma exchange" Keyword section.

We revised Abstract section as follows,

“Because her condition became seriously exhausted, corticosteroids were tapered and supportive therapies including intravenous hyperalimentation, **replenishment of albumin and gamma globulin, plasma exchange**, and infection control were continued.”

Together with the comment from Reviewer 1, we deleted colitis and instead added plasma exchange in Key words.

2 Minor revision Please unify "plasmapheresis" or "plasma exchange".

We replaced plasmapheresis to plasma exchange.

*3 In legend of table 1, "****Casts:: granular casts." was wrong. Revise to "****Casts: granular casts.". Please verify.*

Thank you for careful review. We revised as pointed out.

Response to reviewer 3

This case of CPA-associated severe enteritis is novel and unique. The authors did a great job in their investigation, presentation, title, techniques and discussion.

We thank you for reviewing our manuscript.

Response to EDITORIAL OFFICE'S COMMENTS

(1)The "Author Contributions" section is missing. Please provide the author contributions;

We added the information

Author contributions: HS and TS performed the literature review, and wrote the manuscript. TS, HF, TI, and HH were involved in the clinical management.

(2) The authors did not provide the approved grant application form(s). Please upload the approved grant application form(s) or funding agency copy of any approval document(s);

We uploaded the approved application form.

(3) The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor;

We included the Image file.

(4) The "Case Presentation" section was not written according to the Guidelines for Manuscript Preparation. Please re-write the "Case Presentation" section, and add the "FINAL DIAGNOSIS", "TREATMENT", and "OUTCOME AND FOLLOW-UP" sections to the main text, according to the Guidelines and Requirements for Manuscript Revision.

We revised the Case Presentation section as indicated.
