## [Clinical Update: Cardiovascular Disease in Diabetes ...](https://www.ahajournals.org/doi/10.1161/CIRCULATIONAHA.116.022194)

<https://www.ahajournals.org/doi/10.1161/CIRCULATIONAHA.116.022194>

Understanding the mechanisms, strategies for and challenges with managing ASCVD and **heart failure risk** in **diabetes mellitus**, as well as the potential cardiovascular risks and benefits of glucose-lowering drugs, is important for managing **cardiovascular disease** in **diabetes mellitus**. In this **clinical update**, we review the current understanding of the mechanisms of ASCVD and **heart failure** in **diabetes mellitus**, management of these cardiovascular conditions in the **diabetes mellitus** ...

## Heart Disease and Diabetes | Clinical Diabetes

<https://clinical.diabetesjournals.org/content/21/1/10> ▾

Jan 01, 2003 · For most people, not getting enough blood to the heart leads to **symptoms** such as chest pain or pressure, jaw pain, arm pain, shortness of breath, sweating, and pounding heartbeat. However, many people with **diabetes** and **heart disease** do not notice any **symptoms** at all. Medical care providers call this condition “silent ischemia.”

## Heart Diseases

Conditions of the heart including structural and functional abnormalities.

### Common types

#### Heart Failure

A progressive heart disease that affects pumping action of the heart muscles.

#### Coronary Artery Disease

Coronary artery disease (CAD), also known as coronary heart disease (CHD), ischemic heart disease (IHD), or simply heart disease, involves the reduction of blood flow to the heart muscle due to build-up of plaque (atherosclerosis) in the arteries of the heart. It is the most common of the cardiovascular diseases. Types include stable angina, unstable angina, myocardial infarction, and sudden cardiac death. A common symptom is chest pain or discomfort which may travel into the shoulder, arm, back, neck, or jaw. Occasionally it may feel like heartburn. Usually symptoms occur with exercise or emotional stress, last less than a few minutes, and improve with rest. Shortness of breath may also occur and sometimes no symptoms are present. In many cases, the first sign is a heart attack. Other complications include heart failure or an abnormal heartbeat.

#### Irregular Heartbeat

Any change from the normal sequence of heart's impulses causing the heart to beat too fast, too slow, or erratically.

#### Cardiomyopathy

An acquired or inherited disease of the heart muscle which makes it difficult for the heart to pump blood to other parts of the body.

#### Ventricular Tachycardia

Fast heart beat rhythm of the ventricles.

#### Tachycardia

A heart rhythm disorder with heartbeats faster than usual, greater than 100 beats per minute.

#### Angina
