<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3771768>

RESULTS. Duodenal duplication cysts (DDC) are rare and account for 2% to 12% of gastrointestinal duplications with an incidence of < 1 per 100,000 live births. 1 DDC is usually located on the postero-medial border of the first and second part of the duodenum and sometimes may be associated with other abnormalities, such as complete colonic duplication, gastric diverticulum, and neurenteric cysts.
