

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Clinical Cases

**Manuscript NO:** 63188

**Title:** The value of refined care in the patients with AECOPD

**Reviewer's code:** 02855868

**Position:** Peer Reviewer

**Academic degree:** MD, MRCP, PhD

**Professional title:** Emeritus Professor, Professor

**Reviewer's Country/Territory:** Iceland

**Author's Country/Territory:** China

**Manuscript submission date:** 2021-02-23

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2021-02-24 10:15

**Reviewer performed review:** 2021-03-22 15:05

**Review time:** 26 Days and 4 Hours

<b>Scientific quality</b>	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Very good <input checked="" type="checkbox"/> Grade C: Good <input type="checkbox"/> Grade D: Fair <input type="checkbox"/> Grade E: Do not publish
<b>Language quality</b>	<input type="checkbox"/> Grade A: Priority publishing <input checked="" type="checkbox"/> Grade B: Minor language polishing <input type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
<b>Conclusion</b>	<input type="checkbox"/> Accept (High priority) <input type="checkbox"/> Accept (General priority) <input checked="" type="checkbox"/> Minor revision <input type="checkbox"/> Major revision <input type="checkbox"/> Rejection
<b>Re-review</b>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<b>Peer-reviewer statements</b>	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

#### **SPECIFIC COMMENTS TO AUTHORS**

Acute exacerbation of chronic obstructive pulmonary disease is a complex pathological change in the course of chronic obstructive pulmonary disease. Sputum can passively move with the cilia in the airway, gradually expel the sputum from the depths of the airway, and cough out the sputum by stimulating the sensory nerve on the surface of the airway to cough out of the body under physiological conditions. It can lead to sputum accumulation and affect the exchange of oxygen and carbon dioxide in the lungs when sputum is thick, cough is weak, or tracheal cilia is abnormal. The implementation of nutritional nursing can improve the physical quality of patients and improve immune function through the management of respiratory tract, improve the condition of patients and improve the comfort of respiratory tract. In this study, Na et al investigated on the effect of refined nursing strategies on patients with chronic obstructive pulmonary disease with dysphagia. Overall, this study is very interesting, and the manuscript is very well written. Comments: 1. The manuscript required a minor language editing. Some minor language polishing should be revised. 2. Title is too long, please short it. 3. A background should be added to the abstract. And results are too long in the abstract. 4. The results are reasonable, and well discussed. 5. A conclusion should be made in the main text. 6. References should be edited.
